# Website description

Welcome to the Rock Paper Scissors Game, your go-to destination for a fun and interactive game against the computer. Our project offers a simple platform where users can select their move, and the computer randomly generates its move, with the results displayed instantly.

Our user-friendly design ensures an enjoyable experience for all ages, with visually appealing graphics that enhance the gaming experience. Whether you're looking to pass the time or challenge your friends, our Rock Paper Scissors Game is the perfect choice for a quick and entertaining diversion.

# Project Brief

## Project Name

Rock Paper Scissors Game.

## Project Objectives

- **Provide Entertainment**: Create an engaging and enjoyable game that users of all ages can play and enjoy.
- **User-Friendly Interface**: Design a simple and intuitive interface that makes it easy for users to navigate and play the game.
- **Instant Feedback**: Ensure that users receive immediate feedback on their choices and the game's outcome.
- **Randomized Computer Moves**: Implement a reliable algorithm that generates random moves for the computer, ensuring fair play.

## Target Audience

This game is designed for individuals of all ages who seek a quick, engaging, and entertaining online activity. It caters to casual gamers looking for a fun way to pass the time, as well as competitive players who enjoy challenging themselves and others in a classic game of strategy.

## Technologies Used:

- **HTML:** Provides the structural framework for the Rock Paper Scissors game, organizing and displaying elements such as the buttons for selecting Rock, Paper, or Scissors, and the area where the results are shown.
- **CSS:** Enhances the visual design and layout of the game, ensuring a clean, responsive, and aesthetically pleasing interface that adapts to various devices and screen sizes, making the game enjoyable to play.
- **JavaScript:** Powers the game logic, including randomly generating the computer's moves, determining the winner, and providing immediate feedback to the user based on their selection and the computer's choice.
